

## Sauren Global Balanced – Factsheet

As at: 28.03.2024

### Investment profile

Sauren Global Balanced is a fund of funds with a balanced asset management approach. As a modern multi-asset strategy, it offers a broadly diversified portfolio for investors with a long-term investment horizon. Sauren Global Balanced invests mainly in other funds; such as equity, absolute return, and fixed-income funds. You will find detailed information about the investment opportunities in the current valid prospectus.

The fund selection is done according to Sauren's established person-related investment philosophy, with a focus on the skills of the fund managers in consideration of the asset under management.

### Notes on the performance

Source: CleverSoft FondsDB, Sauren Fonds-Research AG; As at: 28 March 2024

The Investor would like to buy shares for 1,000.-- € and due to a 5 % front-end load the total payable amount rises to 1,050.-- €. The gross performance (BVI method) is based on the published redemption prices of the Fund of Funds, which includes all costs incurred at the fund level (e.g. management fee), the net performance also includes the front-end load. The front-end load is only payable at the day of investment and therefore reduces the performance in the first year. In the following years no front-end load is considered, as such the net performance is not displayed in the bar chart as it is equal to the gross performance. Additional costs may be incurred at the investor level (e.g. custody costs). If the front-end load were taken into account in the line chart the performance in the chart would be lower.

Due to its composition / the techniques used for its management, the fund is exposed to increased volatility; this means that unit prices may be subject to considerable upward and downward fluctuations, even within short periods of time.

The chart shows the performance achieved under the same investment conditions of a unit class launched in 1999 of a fund previously existing in a different legal form until December 31, 2021. The Unit class is that of a fund that previously held another legal form, but was adapted in 2014 to meet European requirements for the funds business and has been UCITS-compliant since then.

Past performance is not a reliable indicator of future performance.

### Net Equity Exposure

as at 31 January 2024

Indicative Net Equity Exposure 40.5 %

The indicative net equity exposure is calculated based on the weighted net equity exposure of each target fund as well as the instruments held by the fund of funds. This includes direct equity exposure as well as exposure via derivatives. The calculation of the net equity exposure is depended on the supply and the quality of the data as well as on the point in time when the data is supplied by the individual target fund. As such the indicative net equity exposure is always to be treated as a rough estimate based on the preceding month end.

### Sauren ESG-Scoring

## Explanations of Sauren ESG-Scoring

The proprietary Sauren ESG scoring process is applied to all target funds. The process seeks to determine the extent to which the manager of a target fund includes environmental aspects, social aspects and principles of sustainable corporate governance (ESG) in their investment decisions, without the result having a direct impact on investment decisions at the fund of funds level. The ESG scoring process is not designed to serve as a seal of quality. Rather, it is aimed at raising awareness of ESG criteria and their inclusion amongst target fund managers. You can find further information on the process on the website at [www.sauren.de](http://www.sauren.de). The fund does not pursue a dedicated ESG strategy.

<sup>1</sup> For those share classes for which "Distribution" is indicated under "Dividend Policy", the intention is to only distribute the potentially low taxable portion of the positive income pursuant to German tax law. **The tax treatment is also dependent on the personal circumstances of the individual investor and may be subject to change in future.**

<sup>2</sup> The minimum equity participation rate is relevant for the German tax classification and does not offer a direct conclusion about the equity market exposure of the fund. **The tax treatment is also dependent on the personal circumstances of the individual investor and may be subject to change in future.**

<sup>3</sup> From this fee, the management company as well as the central administration agent and the custodian are paid.
