

Sauren Global Growth – Factsheet

As at: 31.03.2021

Investment profile

Sauren Global Growth is an equities-oriented asset management fund of funds to cover the global equities markets for investors with a longer-term investment horizon. The broadly diversified portfolio has a global orientation and is predominantly invested in regional and national equities funds. Detailed information on the investment policy can be taken from the most recent sales prospectus.

The fund selection is done according to Sauren's established person-related investment philosophy, with a focus on the skills of the fund managers in consideration of the asset under management.

Yearly Returns (in %) – Share Class A

Performance since inception (in %) – Share Class A

Notes on the performance

Source: CleverSoft FondsDB, Sauren Fonds-Research AG; As at: 31 March 2021

The investor would like to buy shares for 1,000.-- € and due to a 5 % front-end load the total payable amount rises to 1,050.-- €. The gross performance (BVI method) is based on the published redemption prices of the Fund of Funds, which includes all costs incurred at the fund level (e.g. management fee), the net performance also includes the front-end load. The front-end load is only payable at the day of investment and therefore reduces the performance in the first year. In the following years no front-end load is considered, as such the net performance is not displayed in the bar chart as it is equal to the gross performance. Additional costs may be incurred at the investor level (e.g. custody costs). If the front-end load were taken into account in the line chart the performance in the chart would be lower.

The fund is subject to heightened volatility, due to composition. Consequently, unit price may fluctuate sharply in either direction within short periods of time. The share class was launched in 1999. In 2014, the Fund was adapted to European requirements for the funds business, and has been UCITS-compliant since then.

Past performance is not a reliable indicator of future performance.

Asset Allocation

as at 31 March 2021

Equity Funds Europe	31.8 %

Explanations of Sauren ESG-Scoring

The proprietary Sauren ESG scoring process is applied to all target funds. The process seeks to determine the extent to which the manager of a target fund includes environmental aspects, social aspects and principles of sustainable corporate governance (ESG) in their investment decisions, without the result having a direct impact on investment decisions at the fund of funds level. The ESG scoring process is not designed to serve as a seal of quality. Rather, it is aimed at raising awareness of ESG criteria and their inclusion amongst target fund managers. You can find further information on the process on the website at www.sauren.de. The fund does not pursue a dedicated ESG strategy.

Performance Fee	none	none
Minimum Investment	none	none

Trailer fees of the target funds are attributed to the assets of the relevant fund of funds.

1 For those share classes for which "Distribution" is indicated under "Dividend Policy", the intention is to only distribute the potentially low taxable portion of the positive income pursuant to German tax law. **The tax treatment is also dependent on the personal circumstances of the individual investor and may be subject to change in future.**

2 The minimum equity participation rate is relevant for the German tax classification and does not offer a direct conclusion about the equity market exposure of the fund. **The tax treatment is also dependent on the personal circumstances of the individual investor and may be subject to change in future.**

3 From this fee, the management company as well as the central administration agent and the custodian are paid.

4 The risk and reward profile uses a ratio based on volatilities (see the KIID/Wesentliche Anlegerinformationen). This risk indicator relies on historical data and cannot be used as a basis upon which to forecast future performance. 1 represents low risk and a potentially lower reward and 7 stands for high risk and a potentially higher reward.

5 The sales agent's risk class assessment is not the same as the risk profile in the sales prospectus and the risk and reward profile in the KIID (Wesentliche Anlegerinformationen) and is carried out from the point of view of an investor whose base currency is the same as that of the share class. 1 stands for low risk, 7 for high risk.

6 This share class is amongst others restricted to clients of independent financial advisers or institutional investors according to the EU Directive MiFID II (other permitted investors see prospectus). To subscribe to this share class an investor has to comply with the special terms and conditions outlined in the prospectus.

This information is designed as product advertising.

This document constitutes neither an offer nor a solicitation to buy shares of any investment funds. Comprehensive information regarding opportunities and risks can be found in the current sales prospectus. Any investment application will be made solely on the basis of the information contained in the KIID (Wesentliche Anlegerinformationen), the sales prospectus for that fund including all the terms of contract, the management regulation and articles of association, the most recently published and audited annual report and the last unaudited semi-annual report, which can be obtained in German from Sauren Fonds-Service AG, P.O. Box 10 28 54, 50468 Cologne, Germany (or online at www.sauren.de) or IP Concept (Luxemburg) S.A., société anonyme (or online at www.ipconcept.com) free of charge.

Opportunities

- ▶ Participation in the appreciation of the global equities markets.
- ▶ Achieving excess returns over the trend in the global equities markets through focused selection of promising fund managers.
- ▶ Active fund of funds management and continuous monitoring of portfolio positions.

Risks

- ▶ Risk of decrease in unit price due to general market risks (e.g. price, currency or liquidity risks).
- ▶ Risks from the target funds selected for the fund of funds and the investment universe, particularly from the equities market.
- ▶ Risk of increased fluctuations in the unit price (e.g. due to investment in emerging nations, second tier securities and specific industries).
- ▶ Risks that the investment policy goals of the fund of funds or target fund are not achieved.

Comprehensive information regarding opportunities and risks can be found in the current sales prospectus (which is available in German only).
